## TÜV SÜD's ASME Code Services

We open doors to your markets worldwide.

The "**ASME Boiler and Pressure Vessel Code**" is the international leading set of regulations for the design, manufacturing and testing of pressure equipment and pressure components. Components built in compliance with the ASME Code are recognised not only in the USA and Canada, but also in over 100 further countries. **ASME certification** thus enables manufacturers to market their products worldwide and opens the door to customers conducting international operations. By applying the official ASME stamps to the manufacturer's plate, the certification experts confirm that the products comply with the ASME Code and the required safety standards.

### TÜV SÜD services

TÜV SÜD Industrie Service GmbH is a Notified Body under the Pressure Equipment Directive 2014/68/EU and **an ASME-accredited authorised inspection agency**. Our ASME inspectors (AIs) offer comprehensive and efficient support on all aspects related to the ASME Code. You too can benefit from our services:

- Consulting services addressing the ASME Code, also in combination with the EU Pressure Equipment Directive 2014/68/EU
- Support with the application for manufacturer certification
- Support in establishing a QA system as per the ASME Code
- Preparation for the ASME certification audit
- Certification of welders and welding procedures

- Production checks
- Review/preparation of calculations as per the ASME Code
- Acceptance testing of components to be delivered with or without ASME stamp
- Advice (NDT) by ASNT inspectors
- Organisation of ASME workshops
- Training of employees

### Your benefits:

#### ► Benefit from an experienced partner.

Our plant safety experts have decades of international practical experience in the fields of steam, pressure and plant engineering.

#### ► Ensure legal compliance.

Thanks to their intensive participation in the preparation of technical directives and European standards, our engineers are highly familiar with the state of the art and statutory regulations.

#### ► Ensure one-stop services and efficiency.

We offer CE marking and approval in accordance with the ASME Code from a single source, ensuring you are fit for the global market.

The TÜV SÜD brand ensures a first-class reputation throughout the world, giving you the certainty that our reports and certificates will be widely accepted on the market.

**We will be happy to support you. Do not hesitate to contact us.**
